ADVANTAGES OF PAINT PROTECTION FILM

A-PILLAR + FRONT ROOF LINE

This area can become surprisingly damaged due to stones flicking up from the road as well as tree branches and road debris. Adding a strip of Paint Protection Film helps to shield your car from the elements.

SIDE MIRROR CASINGS

Side mirrors can come up against all sorts of damage. From stones to tree branches, Paint Protection Film flexibly molds to the shapes of the mirror casings to help keep your paintwork free from chips and scratches.

BONNET

Hate those annoying stone chips on your bonnet? The front end of the car exposed to the most amount of damage. Protect your bonnet from stone chips and other such damage, with either full or partial coverage.

DOOR EDGES

Reduce wear and tear on the edge of your vehicle's doors. Edge protection is an excellent option to help shield against potential chipped paint and scrapes that often occur in parking lots.

REAR BUMPER BARS

Getting your shopping luggage, golf clubs or the kids' sports gear in and out of the boot is sure to cause some scratches and scrapes to your rear bumper panels. A strip of paint protection film provides a durable protective layer.

FRONT BUMPER BARS

Reduce the damage of bumper bars (and wheel arches) with paint protection film. The invisible film provides a layer of protection from scrapes and scratches. Protecting the paintwork.

DOOR HANDLE CUPS

Ever noticed how damaged the door handles and cups get from constant use? Scratches and scrapes are inevitable and are inevitable to this area of the car. The almost invisible protection of paint protection film is the solution.

DOOR SILLS

Child proof your car with paint protection film applied to the door sills. This area of the car can become damaged quite easily, but with a layer of almost invisible protection will help prevent your paint work from all sorts of damage.

SUPERIOR PROTECTION

SELF HEALING

HEAT RESISTANCE

EASY TO REPAIR

PRESERVES RESALE VALUE

DON'T WORRY, THE FILM ISN'T RED!
Red panels above indicate the areas typically protected and is for demonstration purposes only. The paint protection film is optically clear.
